

GENTRACKER™

Generator Monitoring System

By Generator Solutions, Inc.

Gen-Tracker's **Monthly Report** is one of the most important pieces of documentation that Gen-Tracker provides to you and your customers. Emailed on the first of each month, the Monthly Report shows all the activity reported by Gen-Tracker for the previous month. The first report below shows a unit that lost its exercise followed by some generator runs for the service person, finally a return of regular 20 minute exercise. The lower report displays exercises, followed by a Utility Loss and extended run from the generator. Total run time for the month was 9 hours.

Monthly Generator Activity Report

Generator:

Gen-Tracker #2202

Start Date	End Date	Signal Description	Duration
02/04/13 8:58 AM	02/04/13 9:18 AM	GENERATOR ON	0:20

Total Runtime: 9:01

GENTRACKER™

Generator Monitoring System

By Generator Solutions, Inc.

Gen-Tracker's **Daily Report** is probably the most important tool for dealers. As more of your customers are being monitored by Gen-Tracker, it gets harder to keep track of all of your customers. The Daily Report is emailed to your service department each morning with detail on all of your customers generators reporting a troubled state.

Daily Gen-Tracker Report - Generators R US (Sample)

1174 EXERCISE OVERDUE
1174 OFFLINE

Generator Solutions
533 Hayward Avenue
Suite 150
Oakdale, MN 55128
651-770-9405

The above sample report shows a Daily Report with just one customer reporting an Overdue Exercise, and Gen-Tracker Offline signal.

The report to the right displays a number of customers with a variety of issues.

As your service department sees this list, the course of action would be to delegate and reach out to these customers arranging service calls where necessary.
